EXPERIENCE

Fullstack Developer

Codalien Technologies Pvt. Ltd.

Feb 2019 – Present

New Delhi, DL, India

- Worked on both frontend (web and mobile) and backend applications powered by technologies such as react vue node keystone and mongodb graphql.
- Reviewed and maintained code structure for junior developers and interns.
- Delivered blah blah etc deployment and maintainence.

Software Development Intern

DataGrokr Analytics Pvt. Ltd.

Jun 2017 - Dec 2017

Bengaluru, KA, India

- Worked independently as well as assisted senior developers in various coding and testing functions.
- Worked on several DevOps technologies including AWS Cloud Services (EC2, S3, Route 53, CloudFormation, API Gateway, etc.), Python, Shell scripting and Chef.
- Also built web applications using Angular 2 with back-end REST API powered by python scripts running in AWS lambda service.

PROJECTS

Drata (Electron App) - <https://drata.com/>

- A system monitoring app (Windows, Mac and Linux) designed for employee workstations.
- After registration, the app runs in background (minimized to system tray) and monitors the system (sending logs to the server).
- I led the frontend app development using a VueJS frontend running on ElectronJS platform (with Osquery binary files packaged for running system info queries).

Perspectico AI - <https://www.perspectico.com/>

- Perspectico is a collection of Job management tools such as AI powered assessment tools, Job search, Competency Tests, Webinars and Courses.
- I contributed to the frontend web portal powered by ReactJS during a 3 month overhaul sprint.

1UPVision VMS - <https://www.1upvision.com/>

- A visitor management system application with a visitor facing app (VMS) and an admin dashboard app (workspace/visitor management).
- I contributed to both frontend applications (powered by ReactJS).
- A major contribution was a dynamic form generator where use can drag drop form elements from a toolbar and arrange them to create custom forms (for visitors).

Evermee (Mobile App) - <https://evermee.com/>

EDUCATION

B.Tech. (CSE) - 62.4% CGPA

Inderprastha Engineering College (AKTU)

2017

Ghaziabad, UP

XIIth (CBSE) - 72.5%

Tagore Sr. Sec. School

2012

Mayapuri, Delhi

Xth (CBSE) - 74.2% CGPA

N.C. Jindal Public School

2010

Punjabi Bagh, Delhi

TECHNICAL SKILLS

ReactJS

VueJS

React Native

NodeJs

Express

SKILLS

- 3 years of experience solving engineering problems.
- 2+ years of experience writing JavaScript code in production.
- Deft at reverse engineering / figuring things out with no prior knowledge.
- Adept at writing testable, modular and simple code. A TDD person.
- I approach solutions with "How can it fail" and "What if it fails" mindset.
- Skillful in profiling and optimizing code.
- Really good at finding patterns and relations.
- Proficient in developing microservices and modules.
- Experience with MongoDB, PostgreSQL.

- An online jewellery store (powered by shopify) that sells jewellery with embedded NFC tags.
- Users can scan these jewellery in Evermee mobile app, and add a memory (a photograph with text message).
- I worked on both the fulfillment and user application (with NFC scanning functionality) powered by React-Native (for both iOS and Android).
- I also contributed to the backend CMS powered by KeystoneJS (A Node, Mongo based framework that provides a CMS admin panel powered by NextJS).

MORE PROJECTS

MarketMole - <https://marketmole.biz/>

- An Application used by companies such Sony/Netgear to monitor their products sales and reviews on ecommerce web-sites like amazon, walmart, etc.
- I contributed to both the frontend web app (powered by Angular 4) and the backend services (Serverless Node).

BMW Prive CRM - <https://crm.bmwprive.com>

- Member of BMW CRM team, with responsibilities to build the frontend interface for the CRM.
- All API's were provided and we integrated it in React JS.
- Some parts like Auth/Signin were built in React JS because of some company guidelines for public facing pages, but the full internal CRM application was React JS.

Proximity.io - <https://prox.io/>

- Video Chatting application reactweb reactnative firebase twilio
- outsourced to Belzabar Software

Credbo - <https://www.credbo.com/>

- Expense management app for retailers and wholesalers
- frontend react backend node keystone graphql

TravX - <http://travx.in/>

- VueJs app cordova KeystoneJs GraphQL backend
- Lead developer fullstack
- <https://play.google.com/store/apps/details?id=com.travx.app>

LeapSkills - <https://www.leapskills.in/>

- Worked on frontend react native application
- Lead developer fullstack

Novartis PSP - <https://www.novartis.com/>

- Worked on both frontend react-native app and backend nodejs app
- <https://play.google.com/store/apps/details?id=com.novartispdp>

ToyFull (On Going) - <https://toyfull-app.web.app/>

- Worked on frontend react application (backend in magento)

WHY ME?

- I see failures as a path to success and knowledge.
- I keep my pride and ego aside to create room for improvement and learning.
- I strive for simplicity and I don't confuse simple with easy.
- When necessary, I am willing to unlearn what I know and start over.
- I understand that not everyone is the same. People can have completely different opinions.
- A believer in creating habits and consistency.

WHAT I LOOK IN MY NEXT EMPLOYER

- Opportunity and freedom to experiment with ideas and guidance to put them to work.
- Good mentorship to help me grow both personally and technically.
- More emphasis on quality than on "just get the things done" attitude.
- Encouragement and appreciation for open source contribution.
- Measures work by quality, creativity and not quantity, lines of code, work hours etc.

HOBBIES

- Playing Online Multiplayer Video Games.
- Listening to Music. Playing Guitar.
- Exploring Places.
